Professional Experience

Marsa Maroc

Casablanca, Morocco | 01/03/2023 - 01/04/2023

Full-Stack Intern

- Built a responsive full stack web application for managing ships, workers and reporting issues using Laravel, Breeze and Tailwind CSS
- Integrated Laravel Breeze to deliver secure access to users and admin functionalities through user authentication and authorization; reduced unauthorized access by 90%
- Designed and Optimized an user-friendly interface using Tailwind CSS for easy navigation and optimal user experience on both desktop and mobile platforms, resulting in a 30% increase in user engagement.
- Enabled admins to efficiently manage ship data, worker information (humans and machines), and track issue reports through the admin dashboard, resulting in a 40% reduction in data entry errors and improved productivity for a team of 5 admins.
- Added search functionality on the user dashboard, allowing users to search for ships and workers by their numbers, and report problems, resulting in a 25% increase in user satisfaction and a streamlined issue resolution process.
- Collaborated with 5 developers to build the UML for having an easy start of project.

Project Experience

Rent Cars

Web application using Laravel, Alpine.js and MySQL

- Developed a web application that allows users to view and reserve available cars for rent, using Laravel, Alpine.js, and MySQL.
- Implemented a reservation status feature that allows users to easily check the status of their chosen car, whether it is confirmed or not.
- Efficiently managed car availability by marking reserved and confirmed cars as unavailable for other users, ensuring smooth functioning of the system.
- Created a feature that allows users to view the estimated time of arrival for unavailable cars, enabling them to plan their reservations accordingly.
- Utilized Laravel, Alpine.js, and MySQL to create an intuitive user interface and deliver a seamless user experience.
- Resulted in improved user satisfaction and streamlined reservation process.
